## INTRODUCING... THE CAR PARK PROTECTION SUITE

Flowcrete Middle East has developed the Car Park Protection Suite concept so that any car park, regardless of scale, can make its supply chain more efficient by sourcing the majority of the parking facility's protective elements direct from one supplier, with one point of contact and under one manufacturer's warranty.

WHY CHOOSE  
THE CAR PARK  
PROTECTION  
SUITE?

- All items sourced from one supplier
- Single source guarantee for peace of mind
- One combined quotation from a Flowcrete approved applicator
- Full protection of all aspects of the structure
- More cost-effective solution when supplied as a full package

### ISOCRETE HD

### K-SCREED

A semi-dry, cementitious screed

### DECKSHIELD

### ID/ED

Interior and external deck coating systems.

### DECKSHIELD

### CONCRECOAT

A high performance coating system

### DECKSHIELD

### ACCESSORIES

A range of accessories that promote safety.

WHAT'S  
INCLUDED IN  
THE PROTECTION  
SUITE?

# What's included in the Car Park Protection Suite?

**ISOCRETE HD  
K-SCREED**

A semi-dry, cementitious screed incorporating proprietary additives to produce a high strength screed capable of withstanding the intense weight of a fully loaded car park facility.

Isocrete HD K-Screed's innovative "K" additive also reduces the water content in the mix design leading to significantly shorter cure times and reduces/eliminates the risk of shrinkage cracks.

**DECKSHIELD  
ID/ED**

A flexible, solvent free traffic coating system which provides seamless and colourful finishes and carries a proven track record in some of the region's busiest car parks.

This innovative design is combined with a thick system build up that ensures a sufficient amount of resin content is applied to resist the heavy, continuous traffic and to avoid early delamination of the system.

**DECKSHIELD  
CONCRECOAT**

A single component system for use on the walls, columns, soffits and ceilings in interior parking structures. It can be applied onto a wide variety of substrates including; concrete, plaster, brick and asbestos cement.

This system can be used to add coloured zones to large scale car parks allowing visitors to find their vehicles easier, and its high reflective properties enhance brightness around the facility.

**DECKSHIELD  
ACCESSORIES**

A range of rubber products that promote safety and protection from vehicles when maneuvering round parking facilities. As well as wall and corner guards, speed humps and wheel stops are also available.

The accessories are made of high quality, recycled materials and are available in UV stable grades allowing protection from the harsh Middle Eastern climate.

## Environmental Benefits

Utilising our Car Park Protection Suite also allows architects and developers to be pro-active in qualifying for Green Building credits such as BREEAM and LEED. As an Emirates Green Building Council member, we understand the importance of locally available products and manufacture in the UAE and KSA.
